The Breath of Life

Psalm 137: 1-7 (NIV)

Do not fret because of those who are evil or be envious of those who do wrong; for like the grass they will soon wither, like green plants they will soon die away. Trust in the Lord and do good; dwell in the land and enjoy safe pasture. Take delight in the Lord, and he will give you the desires of your heart. Commit your way to the Lord; trust in him and he will do this: He will make your righteous reward shine like the dawn, your vindication like the noonday sun.

Afternoon Snacking Key To Achieving Weight-Management Success

(NAPSA)—Here's food for thought: In an attempt to stay on track with weight-management goals, more than 57 percent of women surveyed try to skip their afternoon snack. But waiting too long between meals may lead to unhealthy eating at the next meal. Instead, snacking on items containing whole grains and fiber can stave off afternoon hunger and help weight managers achieve their goals.

In the survey commissioned by Kellogg Company, Opinion Research Corp. found that 44 percent of women cited afternoons as their prime time for snacking. This long stretch between lunch and dinner presents weight managers with a tricky moment of truth: how to satisfy their hunger without sacrificing their goals.

"We know from talking with consumers that planning snacks ahead of time is important to assist in your weight-management goals while you are at work or on the go," says Julie Salmen, R.D., Kellogg Company. "But with a savory, crunchy snack like Special K® Crackers, women now have a snack that provides eight grams of whole grains and one gram of fiber in a 90-calorie portion to help them stay on track."

One person gives freely, yet gains even more; another withholds unduly, but comes to poverty. A generous person will prosper; whoever refreshes others will be refreshed.

People curse the one who hoards grain, but they pray God's blessing on the one who is willing to sell. Whoever seeks good finds favor, but evil comes to one who searches for it. Those who trust in their riches will fall, but the righteous will thrive like a green leaf.

Sideburns got their name from General Amrose Everett Burnside, who was easily identified by his mutton-chop whiskers. This style was first known as burnsides.

And Then There is Ai

by Lisa Luck

The Earth is a diverse place teeming with life of all kinds. Plants, animals, birds and humans populate every inch of the earth. The atmosphere, earth and water support life providing the oxygen, water and food that is needed for survival. The earth supports an estimated 2.17 million different species. Each species requires its own special habitat that contains everything necessary for survival. When the habitat suits a particular species, that species not only survives but thrives and multiplies.

Humans have been the most successful species and have increased in population to 8.3 billion. Humans by far outnumber other species. We have learned to survive in numerous different habitats and can adapt to inhospitable circumstances. Humans have learned to manipulate their environment through artificial lighting, heating and cooling. We have learned to cook and grow foods and beverages for both sustenance and pleasure. Despite our ingenuity and creativity, we have not mastered how to manage waste we create that is affecting all life on earth and we still fight like toddlers.

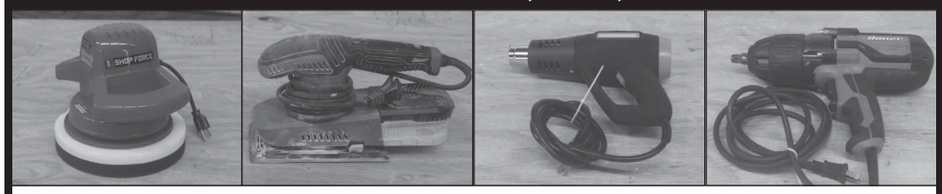

And then there is AI (Artificial Intelligence). This is a new life form being created by humans. According to AI, "Artificial Intelligence (AI) is a branch of computer science that builds systems and machines capable of performing tasks that typically require human intelligence, such as learning, reasoning, problem-solving, perception, and decision-making." Also according to AI, it works by analyzing data, using algorithms to increase knowledge using artificial neural networks. AI is growing at an exponential rate. According to Goldman Sachs, corporations such as Amazon, Microsoft, Google and Meta have collectively spent almost $1 trillion in 2026 to build data centers and invest in other infrastructure needed for AI.

There are several troublesome aspects about this new life form that shares our Earth. It has a voracious need for water and energy to sustain function. Electricity is provided by local power companies although grids are increasingly unstable due to aging infrastructure. Data centers require a large campus and are often built near communities where electric and water resources infrastructure is already available. The centers pollute the air and disrupt life by the sounds made as they operate. It is estimated in the next 25 years that data centers will triple the amount of toxic electronic waste. One data center in New Jersey has recently been accused of illegally operating 62 gas turbines after a drone exposed the generators. Many of the data centers are established in secrecy before a community has a chance to give input on whether or not they want them.

Our administration has refused to regulate problems, including AI's ability to act independently and sometimes avoid safety guardrails. AI more and more frequently disregards instruction and tries to cover its tracks when it enters databases that are off-limits. AI's ability to learn from all data in the internet is especially troublesome. It does not differentiate between copyrighted or private data and public data. AI does not have a moral conscience so has no incentive to respect rules.

Directions

Preheat the oven to 400 degrees F (200 degrees C). Lightly grease an 8x8-inch baking dish.

Add uncooked pasta, frozen meatballs, broccoli, mushrooms, Alfredo sauce, and half-and-half to the dish. Season with a bit of Italian seasoning. Stir gently until everything is coated and mostly submerged. Cover tightly with foil.

Bake in the preheated oven until pasta is nearly tender, about 35 minutes. Uncover, stir, and top with mozzarella and Parmesan.

Bake uncovered until cheese is melted and bubbly and pasta is fully cooked, about 10 minutes more. Let rest 5 minutes before serving.

Cook's Note

This recipe calls for Protein+ pasta, which absorbs sauce quickly, so I used the full 15-ounce container of Alfredo sauce. It also keeps a firmer bite than regular pasta, so make sure it's covered tightly so the steam cooks it through. *Regular pasta may need a little less sauce, about 12 ounces.*

Do not merely listen to the word, and so deceive yourselves. Do what it says. Anyone who listens to the word but does not do what it says is like someone who looks at his face in a mirror and, after looking at himself, goes away and immediately forgets what he looks like. But whoever looks intently into the perfect law that gives freedom, and continues in it - not forgetting what they have heard, but doing it - they will be blessed in what they do.

For the word of God is alive and active. Sharper than any double-edged sword, it penetrates even to dividing soul and spirit, joints and marrow; it judges the thoughts and attitudes of the heart. Nothing in all creation is hidden from God's sight. Everything is uncovered and laid bare before the eyes of him to whom we must give account.

When in doubt, tell the truth.

Health Bulletin

Sanitize Your Way To A Healthier Cold Season

(NAPSA)—Even if you can't escape the coughing and sniffling of the cold and flu season, there are steps you can take to protect yourself and your family. Vitamins and washing your hands can be your first line of defense, but the real challenge is stopping the spread of germs once someone is sick.

According to the Centers for Disease Control and Prevention, about 5 to 20 percent of the population gets the flu every year in the United States and the common cold virus accounts for nearly 22 million missed days of school and 20 million missed days of work.

Viruses and bacteria left on surfaces such as doorknobs, tables and desks can live for up to two hours. When a family member begins getting sick, it's important to disinfect linens and surfaces to stop the spread of the virus. But what about disinfecting pillows and stuffed animals that may be damaged in a washer? Laundry appliance manufacturers have added a sanitization cycle to their dryers to help consumers sanitize items that can't be washed or cleaned using normal methods. For example, the sanitization cycle on the Maytag Performance Series dryer is certified by NSF International to remove 99.9 percent of tested bacteria, to help consumers easily clean all items after a bout of sickness.

Stopping the spread of germs can also be accomplished by doing the following:

- Keep sick family members in one area, as cleanup is a lot easier if it isn't spread all over the house.
- Sanitize surfaces with a solution of bleach and water with a 1:10 ratio; don't forget phones, doorknobs and countertops when cleaning.
- Wear rubber gloves when handling used tissues and trash, and remove such items from the house before cleaning.
- Wash all linens in hot water, including towels and washcloths.
- Sanitize bathrooms and don't forget the flush handle on the toilet. If the toilet handle is used before hand washing, it can be one of the most contaminated areas of the house.
- Clean any dishes used by the sick person. A dishwasher is helpful but hot water and a bleach solution will do the job, too.

For more information on preventing the spread of the common cold and flu virus, visit the Centers for Disease Control and Prevention at www.cdc.gov.

The way of fools seems right to them, but the wise listen to advice. Fools show their annoyance at once, but the prudent overlook an insult.

"Kids!"

There are some religions in the Orient that follow practices that are condemned by Scripture and society. A member of one of them was jailed for robbery and murder which was part of his "faith." While imprisoned he was visited by a missionary who shared with him the message of salvation. After he accepted Christ, the missionary gave him a Bible which became his dearest possession. When he appeared before the judge, he testified that he had been brought up to be a worshiper of Kali. As a young child he was taught that if he shed the blood of the victims he robbed he would please Kali - a Hindu goddess - and win her favor. He faithfully practiced his belief in this goddess all of his life. When the judge confronted him with his crime, he broke down and began to weep. After a few moments he was able to speak and with tears streaming down his face told the judge that he had committed many murders - more than he could remember. "How could you be guilty of enormities like these?" asked the judge. Taking his worn Bible from his pocket and holding it up for the judge to see, he replied, "Had I but received this Book as a child, this book of Jesus, my Savior whom I now worship, I would not have done such horrible things." "Exalt the Lord, our God, and worship at His footstool; He is holy," proclaims the Psalmist. How sad it is that so many who have His Word in their homes never allow it to enter their hearts and change their lives.

"OK, I think you'll like these."

STAYING STUCK

Have you ever felt "stuck" in life? You're going through the motions of life, but it seems that life is moving forward without you? It's easy to stay stuck in that situation. Here are some things that keep us "stuck" in life: constantly thinking about the painful things that have happened to us, such as the death of a loved one; a good friend or a spouse who betrayed us; being overlooked for a good promotion at work; being unappreciated for the good work that we do for our family and friends; having money and possessions stolen from us, and many other painful experiences of life – the list goes on and on. I know many people who wear the pain of their past like a badge of honor. They think that continually talking about how so many people have done them wrong shows that they are strong for "enduring" the pain. How wrong that is! Holding on to pain and refusing to let go of it keeps us "stuck" right where we are, with no vision of how to move forward. It is a huge burden and a heavy weight that we choose to drag around with us every day. It depletes our energy, and can also cause us serious health problems. All of us must forgive everyone who has harmed us, and move forward in life without the huge weight of unforgiveness. "Unforgiveness is me drinking poison, thinking it will hurt you."

We all have situations in our lives that we wish were different. We would like to do different work for a living, bring home a larger paycheck, pursue our passions in life that look exciting, and so forth. Having dreams and aspirations is healthy; however, actually pursing them requires risk and the willingness to sacrifice some of the present comforts of life to achieve them. A wise person once said, "if you want something that you've never had, you have to do some things that you've never done." To move ahead in our lives, we have to sacrifice a large amount of our leisure time to put in the work required to achieve our dreams. Great things are not accomplished in life by spending every night watching TV and being a couch potato. We are all created to be in motion, and to move forward in life. All of us can do great things in life. Here is what we need to do: throw away the pain from our past, ask God to help us achieve our dreams, get out of our comfort zone, and do the work needed to turn our dreams into reality.

"For I know the plans I have for you," declares the Lord, "plans to prosper you and not to harm you, plans to give you hope and a future."

– Jeremiah 29:11

If you declare with your mouth, "Jesus is Lord," and believe in your heart that God raised him from the dead, you will be saved. For it is with your heart that you believe and are justified, and it is with your mouth that you profess your faith and are saved. As Scripture says, "Anyone who believes in him will never be put to shame." For there is no difference between Jew and Gentile - the same Lord is Lord of all and richly blesses all who call on him, for, "Everyone who calls on the name of the Lord will be saved."
